

How to FTP the SAVF to the AS/400 from Windows

AS/400 STEPS

The save file must be created on the AS/400 before the FTP happens.

1) At a AS/400 Command prompt type in “CRTSAVF MYLIB/MYSAVF” replacing the MYLIB and MYSAVF with appropriate names.

ShadowSoftware suggests library QGPL and save file that matches the SAVF that was downloaded.

The screenshot shows a terminal window titled "Session A - [24 x 80]" with a menu titled "AS/400 Main Menu". The menu lists 11 options: 1. User tasks, 2. Office tasks, 3. General system tasks, 4. Files, libraries, and folders, 5. Programming, 6. Communications, 7. Define or change the system, 8. Problem handling, 9. Display a menu, 10. Information Assistant options, 11. Client Access/400 tasks, and 90. Sign off. The system name "SHADW400" is displayed in the top right. Below the menu, the prompt "Selection or command" is followed by "===> CRTSAVF FILE (MYLIB/MYSAVF)". At the bottom, function key shortcuts are listed: F3=Exit, F4=Prompt, F9=Retrieve, F12=Cancel, F13=Information Assistant, F23=Set initial menu. A message "Library MYLIB not found." is displayed at the bottom left, and the page number "20/007" is at the bottom right.
